WM-5000T8  
Docking station for WM-5000V8 Guard patrol reader with  
built-in 2.4 GHz wireless communication.  
DATA SHEET

# WM-5000T8

Docking station for WM-5000V8 Guard patrol reader with built-in 2.4 GHz wireless communication.

## Image

## Description

The WM-5000T8 is a 2.4 GHz wireless communication docking station. The station communicates with the WM-5000V8 patrol monitoring system via a 2.4 GHz wireless link, with data transfer to a PC via USB.

The docking station can only be used with the WM-5000V8 Guard patrol reader, which has a 125 kHz reader to record the access times of the checkpoints

## Features

- Military-grade components
- 2,4 GHz wireless communication
- LED indicators
- Communication with PC via USB 2.0
- Transfer up to 5000 events per minute
- IP67 protection

## Specifications

- Communication with WM-5000V8: Wireless
- Communication with PC: USB 2.0
- Material: ABS
- Working temperature: -40°C~+85°C
- Net weight: 200g
- Dimensions: 167x96x40mm

## Package contents

- 1 x WM5000T8 docking station
- 1 x USB cable
- 1 x Software installation CD
- 1 x User guide

## Additional products

- WM-5000V8 Guard patrol reader

## WM-5000T8 dokkoló állomás

## Patrol management software

- Multiple users with different administrative privileges
- Set up checkpoints and organise patrols
- Event logs
- Patrol report
- Statistics, with graphs
- Alerts (Manual, Low battery)
